	Individual Watershed model	<i>Salem Sound Coastwatch</i>
	Climate Haikus	<i>National Parks of Boston</i>
	Using Accordion Books to Document Science	<i>MassArt</i>
	Climate Cart	<i>Stone Living Lab</i>
3:00 PM	Advancing Equity through Practice Session The goal of this session is to build our capacity to advance equity. We are fortunate to be joined by Dr. Kerrie Wilkins-Yel and her UMass Boston Social Advocacy class of first year graduate students. They will lead us in thinking about how to center equity in our lessons. We will take time to hear from the students, revisit the activity sharing with our new practices, and then modify and adapt some of the lessons we observed today through our new lens to fit our own situation. This will be a guided learning and practice session	
4:30 PM	Closing Session - Cementing New Connections We will take some time to be intentional about making new connections, planning opportunities to connect again with this community, and thinking about what we've learned today.	
5 - 7PM	Winery Tour and Social Hour <i>Cash bar. Food provided!</i>
